Press Release

Atul Mistry Joins John Foord's Analytics Team

13/Aug/2021 – John Foord are delighted to announce that Atul Mistry has joined the firm as Cloud Architect, John Foord Analytics.

John Foord Analytics, the Insurtech arm of John Foord, provides cloud-based data solutions to the insurance sector, for clients seeking accurate replacement costs and values for fixed assets across the globe.

Speaking of the appointment, Greg Dickerson, Executive Director at John Foord, said: "Atul brings an incredible depth of knowledge of technologies and services such as Amazon Web Services that will take the development of our Analytics platform to a whole new level.

We are delighted that he recognises the potential of John Foord Analytics, and we look forward to him leading the development of ground-breaking cloud solutions to support clients across the insurance spectrum with appropriate reinstatement costs.

We believe that our investment in data analytics and modelling will be of keen interest to owners, brokers, insurers and lenders in the current climate as businesses seek better analysis of their insurance risks and ways to mitigate costs and limit losses."

Atul said, "I was immediately attracted to the vision of John Foord to use sophisticated solutions and industry experts to deliver faster, data driven analysis of asset values for insurance. They are partnering with the industry's leading insurers and advisors to build a unique proposition and I am excited to work with John Foord on this leading-edge development."

Using machine learning and AI, John Foord Analytics is able to leverage large volumes of cost and location data, collected by John Foord over decades, to create sophisticated models allowing owners, insurers and advisors to get quicker, simpler value-at-risk insights with less disruption.
